Director of The Port Authority Of New York & New Jersey  
Engineering  
4 World Trade Center  
New York City, NY, 10006

Dear Hiring Manager,

I am writing this letter today on behalf of the recent advertisement I saw for your company on LinkedIn. To be specific, I was looking to join the engineering sector of your company and I believe that I am the proper candidate for this job

I read online that your next project is planning a JFK Airport Renewal and I was hoping to be a part of this project. Graduating from The Grove School of Engineering at The City College of New York I received a bachelor's degree in civil engineering getting an exceled education in the field. Furthermore, I attained certificates in AutoCAD and Revit two civil engineering programs which allow me to design blueprints as well as foresee projects and the building of structures. Moreover, I have done a internship with Duka inc. a roofing and structure company for 5 years where I gained experience in designing, reading, and following blueprints. While interning there we worked on big projects like developing a massive 4 floor fitness center and renovations to a local bodega. In this internship position which later became a job for me I began to develop the skills to perform bigger projects like the ones mentioned.

Through this experience I feel I am qualified and prepared to take on big projects like the JFK Airport Redevelopment. I hope you will consider me for the engineering sector in your corporation, and I hope we can arrange a meeting to further discuss this.

Sincerely,
